

PROFILE

Graduate **Data Analyst (Marketing / MarTech)** with a strong Computer Science foundation, currently pursuing an MSc in **Business Analytics & Decision Science** at the University of Leeds. Experienced in using **SQL and Python** to analyse marketing and operational data, build **KPI dashboards** (Power BI / Tableau / Excel), and deliver **clear, stakeholder-ready insights**. Hands-on project experience across **campaign performance**, experimentation concepts, data quality, and analytics-driven decision making in fast-paced environments.

EDUCATION

University of Leeds <i>MSc Business Analytics & Decision Science</i>	2025 – 2026 <i>United Kingdom</i>
Relevant modules: Probability & Statistics, Data Visualisation, Effective Decision Making, Generative AI, Applied AI, R Programming	
ITER, SOA University <i>B.Tech Computer Science and Engineering</i>	2020 – 2024 <i>Odisha, India</i>
Relevant modules: DBMS, Machine Learning, Object-Oriented Programming, Operating Systems, Computer Networks	

TECHNICAL SKILLS

Analytics & Reporting: KPI design, funnel/conversion analysis, trend analysis, insight generation, data quality checks
Experimentation & Methods: A/B testing concepts, segmentation, forecasting, simulation, statistical analysis
Programming: SQL, Python, R (basic), HTML
BI & Visualisation: Power BI, Tableau, Excel (PivotTables, formulas), dashboard development
Libraries & Tools: pandas, NumPy, scikit-learn, Git, Kafka
Data Ethics: fairness evaluation, bias analysis, responsible interpretation

PROJECTS

Marketing KPI Dashboard — Excel & Power BI

- Designed an interactive **self-serve dashboard** to track marketing KPIs including conversion rates, revenue trends, and customer segmentation.
- Automated reporting workflows using PivotTables and formulas, reducing manual effort by **25%**.
- Delivered concise, insight-led performance summaries to support stakeholder decision-making.

Click-Fraud Detection (AdTech) — Machine Learning

- Built an end-to-end ML pipeline to detect fraudulent activity in **digital advertising data**, improving data reliability for performance analysis.
- Performed feature engineering and trained Logistic Regression, SVM, and Random Forest models.
- Compared models using precision, recall, and accuracy to support **risk-based analytical decisions**.

Fairness & Bias Analysis in Income Prediction — Python

- Analysed demographic bias in an income prediction model using the Adult Census dataset, focusing on **outcome disparities rather than accuracy**.
- Evaluated fairness using **Demographic Parity, Disparate Impact Ratio, and Equal Opportunity**.
- Conducted **intersectional analysis (Gender × Race)** to identify compounded disadvantages across groups.
- Clearly documented ethical implications and analytical limitations for stakeholder awareness.

Premier League Table Prediction — Simulation & Forecasting

- Retrieved historical match data via API and engineered rolling team performance features in Python.
- Trained a **Random Forest classifier** to estimate match outcome probabilities.
- Executed a **Monte Carlo simulation (5,000 runs)** to forecast final league positions, including Title, Top-4, and Relegation probabilities.
- Visualised probabilistic outcomes to support scenario-based reasoning under uncertainty.

Credit Risk Segmentation — Python (EDA & Unsupervised Learning)

- Analysed **51,336+ records** using cleaning, EDA, and correlation analysis to identify behavioural patterns and outliers.
- Applied **K-Means (k=4)** and **PCA** to produce interpretable segments and a simple scoring approach for decision

support.

- Validated findings and documented insights for non-technical audiences.

Market Analysis & Forecasting (S&P 500) — Python

- Analysed historical data to identify trends, volatility patterns, and relationships between indicators using structured EDA.
- Built baseline forecasting models (Linear Regression, Random Forest) and evaluated using **RMSE** and R^2 .
- Presented results with clear visuals and concise narratives to support decision-making under uncertainty.

CERTIFICATIONS & ACHIEVEMENTS

- Google Data Analytics Foundation Certificate
- Managed ITER College Fest (Marketing & Security)
- Developed custom smartphone kernels and ROMs

ADDITIONAL

Availability:	Willing to commute for on-site work in London
Working style:	Analytical, detail-oriented, commercially curious; confident explaining insights to non-technical stakeholders
